

FUEL STATIONS

SAVE TIME... BY AVOIDING THE QUEUES AT THE PUMPS & SAVE MONEY... BY BULK BUYING YOUR FUEL.

The Tuffa® Bunded Fuel Stations are complete and ready to use; all that is required is a hard standing flat concrete base and your final electrical connection. All standard diesel storage tanks are fitted with submersible pumping units comprising of pump, flowmeter, delivery hose, and an automatic shut off nozzle, filtration and gauge. Larger capacities also come complete with bund and overflow devices and a lockable security cabinet containing all appropriate equipment.

What is the FMS? The Fuel Level Monitoring System is a combined high accuracy tank level indicator and bund and overflow alarm that is designed to provide both visual and audible alarms whenever a predetermined level in a storage tank is reached. It also gives a content readout in both litres and a percentage and can be pre-configured for Derv, Gas Oil and AdBlue with the option for self-calibration of other liquids. The FMS is fitted to all larger models of capacity 3500 litres plus. This unit includes a free of charge web monitoring package allowing the user to check the tank contents remotely on a computer, or alert the user via mobile application.

Why Buy from Tuffa?

- We are the UK's Largest Manufacturer of Quality Tanks.
- We offer a unique service, whilst being a large operation we still have the groundings of a friendly, family, personal, one to one service.
- Our tanks are tailor made for agricultural, commercial and industrial applications and for the safe, secure and responsible storage of Diesel.
- All refuelling equipment is housed in a high security lockable cabinet that has ample space for extras including hose reels.
- Capacities of 1,350 litres to 15,000 litres are available and interlinking to obtain larger capacities.
- We use only premium quality equipment. Tanks are manufactured with a fully bunded construction that offers protection from weathering and overfilling.
- An overflow prevention device is fitted to all larger models.
- Standard, Economy and Bespoke models including Steel Fuel Tanks are available.
- The FMS, a high accuracy contents gauge unique to Tuffa is fitted to all larger models.
- Tanks are UV Stabilised and Corrosion Resistant.
- A wide variety of options are available to meet your requirements.
- Bespoke tanks available upon request.
- Fire protection available- allowing the tanks to be installed inside thus benefiting security.
- Expert technical advice at hand to assist you.

Optional Extras

- Higher Output Pump (80lpm approx.)
- 12V / 24V Pump
- 10micron Water & Particulate Filter
- Extra Delivery Hose (per metre)
- Lockable Fill Cap
- Fuel Management System
- High Security Steel Cabinet with Roller Shutter
- Armco Protection Barrier
- Hose Reel - various lengths
- Security Light in Cabinet
- Fire Protection
- Lockable Manway Access
